Software Developer

## Current status:

My attention is captivated by programming languages with a strong functional emphasis. For the past few years, I have been mostly writing Clojure and Clojurescript.

I may consider full-time opportunities in SF Bay or remote jobs anywhere else in the US.

## About me:

- Skilled and experienced full-stack software developer. Have built and worked on interactive, responsive, and adaptive web apps, complex enterprise-level solutions, mobile apps, cloud services, and APIs.
- I am a good team player. I have experience in building, training, and leading teams.
- Keyboard junkie. I relentlessly seek ways to enhance my productivity, evangelize and help my colleagues to reduce frustration linked to mundane, repetitive tasks. Maintainer of popular 'M-x Tips' Twitter account where I teach people how to improve their skills.
- Polyglot programmer. I have attained proficiency in several programming languages, including Javascript, Typescript, Coffeescript, Lua, C#, Python, Clojure, and different dialects of Lisp.

I am familiar with Haskell, Ruby, Java, and Go. I also would like to explore other languages, e.g., Rust, Elm, Purescript, and OCaml
